

Expanded Table of Contents

Acknowledgments xx

About the Author xx

Foreword xx

Preface xx

Introduction xx

Chapter 1

A Surprise Healing of My Wife's Illness xx

Synchronicity comes to Vicki's rescue xx

A turning point in my relationship to medicine xx

I learn a key premise of the new medical paradigm xx

Nature has always done the healing xx

Resistance against the new medicine xx

Getting back to the basics of health xx

We must treat the whole person xx

Chapter 2

How I Became Part of the Problem:

The Story of My Medical Training xx

Len will grow up to be a doctor! xx

True medicine is about healing—isn't it? xx

Medical school may be hazardous to your health xx

Being a clinician is about becoming increasingly human xx

Humility is a central quality of excellence in medicine xx

A startling case of my own depersonalization in medical training xx

More depersonalization in working with live patients xx
The theme of separation is at the heart of the medical model xx
Preparing to be a research scientist at the NIH xx
Severe sleep deprivation and medical postgraduate training xx
Learning how to heal through inspiration, not intimidation xx
Initiating change in medicine through political action xx
Can physicians have their own union today? xx

Chapter 3

How “Scientific” Is Scientific Medicine? xx

My hospital rejects the science of clinical nutrition xx
A hospital pharmacy blocks an essential and xx
scientifically proven nutrient
I face resistance in bringing forward a proven technology xx
Just how evidence based is today’s medicine? xx
Ethics issues for research scientists and the FDA xx
Competing scientific models for defining disease xx
and determining treatment
Cellular health: a key concept underlying the new xx
science of medicine
The imperative of properly nourishing our bodies xx
The imperative of detoxification in the face xx
of chemical exposures
Genetic defects disturb cellular biochemistry xx
Our internal pharmacology is regulated by our xx
thoughts and feelings
Modern medicine is at war with nature xx
The failure of our war against diseases xx

Chapter 4

How Well Is America’s Health Care System Working? xx

Our increased spending correlates with a xx
chronic-disease epidemic
Just how counterproductive is mainstream medicine? xx
A health care system at the breaking point xx
The depersonalization of health care delivery xx
Hospitals, HMOs, and the central role of xx
the insurance industry
Physicians are discontented with today’s medical practice xx
Physicians have human needs as well xx
A sad reflection of community values xx
The acute problems of private health insurance xx
The sad consequence of market-driven health care xx

Chapter 5

The Karma of Big Pharma:

Questioning the Drug Industry xx

The impact of direct-to-consumer drug ads xx
Do you still want to take the purple pill? xx
There’s a pill for everything! Or so says Big Pharma xx
Pharmaceutical company ties to Congress xx
Pharmaceutical company ties to physicians xx
Pharmaceutical company ties to medical institutions xx
Big Pharma’s bottom line: patent or no patent? xx
Pharma creates a new category: the “worried well” xx

Chapter 6

Wellness, Prevention, and Healing: The New Direction for Medicine xx

- Getting acquainted with the wellness buffer xx
- The Pete Wilson and Tim Russert stories xx
- Differentiating curing and healing xx
- Focusing on the whole person is nearly impossible xx
in the current model
- Public surveys reveal what Americans want from medicine xx
- Patients and their families demand integrative care xx
- The urgent need for birthing a new xx
paradigm of medicine

Chapter 7

The Birth of the Health Medicine Movement xx

- Groping for an institutional model for Health Medicine xx
- The Health Medicine Forum is born xx
- The evolution of the core principles of Health Medicine xx
- Integrative practice: the first core principle xx
of Health Medicine
- Holism (and integralism): the second core xx
principle of Health Medicine
- Person-centered care: the third core principle xx
of Health Medicine
- Person-centered care: the beliefs of the patient xx
and the placebo effect
- Person-centered care: harvesting the lessons of illness xx
- Prevention and wellness: the fourth core xx
principle of Health Medicine

Chapter 8

Creating an Integrative Medical Clinic xx

- Practical challenges in our first integrative clinic xx
- Starting over with an improved clinical model xx
- Healing Circles: a key innovation xx
- How Healing Circles work in practice xx
- Practitioner responses to Healing Circles xx
- Can mainstream and CAM practitioners work together? xx

Chapter 9

The Imperative of Radical Health Care Reform xx

- A last look at the health care cost catastrophe xx
- The moral problem with private health insurance xx
- The economic argument for universal health care xx
- Universal health insurance: a crucial debate of our time xx
- Physicians favor a single-payer system xx
- Creating health and wellness through national xx
prevention policies
- Integrative health care and federal health policy xx
- Radical reform of the FDA is urgently needed xx
- Making medical freedom a constitutional right xx
- Revisiting freedom of choice and “evidence-based” medicine xx
- The ultimate front line of health care: profit versus service xx

Epilogue: The Spirit of Healing xx

Endnotes xx
